

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

city having undertaken to erect a building for the Institute at a cost of 125,000 Marks.

THE annual horticultural exhibition was held in Paris from the 18th to the 25th of May and a Congress of Horticulture met in conjunction with the Exposition on May 20th and 21st. The Royal Botanic Society, London, held an exhibition of plants and flowers in their gardens at Regent's Park on May 11th.

WE learn from *Natural Science* that Mr. Edouard Foa has travelled across Africa by the basin of the Zambesi, Lake Tanganyika and the Congo, and has brought back numerous specimens of anthropological interest from the region of the great lakes. Dr. Hugo Bücking and Dr. L. van Werneke have started for an eight months' expedition to the Netherland East Indies on behalf of a Dutch Society.

WE receive monthly the *Sei-i-kwai Medical Journal*, edited and published by the Society for the Advancement of Medical Science in Japan, the articles of which, partly in English and partly in Japanese, are doubtless instructive to the Japanese, while those in English are certainly amusing to the English reader. The general style may be gathered from the following:

"Diseases of the animal sphere (or the nerves, senses and muscles). Regarding Japanese pathological constitution the writings of medical and ethnographic authors are not lacking in general remarks which are meant to express in the usual sense. * * * * It would also be an essential task of the surgeon to separate such easings of the treatment of wounds as really are due to constitutional causes, from the consequences of the possibility that perhaps the causes of infection working against the healing art is some way different extra European countries. * * * * The spleen is all malarial, typhus, variola diseases and in those called *και ε'ξοκ'νυ* splenetid diseases, the seat of strong swelling and all corresponding symptoms. Let us observe here that unusually great swellings of the spleen are seldom found, either in post-mortem or clinical examination."

UNIVERSITY AND EDUCATIONAL NEWS.

It is said that Mrs. Phoebe Hearst will erect a building for mining engineering for the University of California at a cost of \$300,000.

MR. HENRY WILDE, F.R.S., has proposed to

endow in Oxford University a readership and a scholarship in mental philosophy. They are to be designated the Wilde readership and the John Locke scholarship.

HOBART COLLEGE, Geneva, N. Y., received \$6,000 for a scholarship by the will of Mrs. Augusta M. Williams, of Newport, R. I.

THE appointments for the coming year in the botanical department, Cornell University, are as follows: Dr. E. J. Durand is reappointed instructor in botany and assistant curator of the Cryptogamic Herbarium, and Mr. K. M. Wiegand, assistant in botany and assistant curator of the Phaneogamic Herbarium. Mr. B. M. Duggar, now assistant cryptogamic botanist to the Experiment Station, has been appointed instructor in botany, with special reference to experimental plant physiology, his time to be divided between instruction and work in the Experiment Station. Two graduate assistantships in botany have been established, the holders to divide their time between assistance and investigation. Mr. W. A. Murrill, B.S., A.M., the present scholar, and Mr. G. T. Hastings have been appointed to these positions for the coming year. Besides these, a fellow, or scholar, is appointed in the department.

THE second summer session of the New York State Library School, Albany, of which Mr. Melvil Dewey is Director, began this year on May 30th, and will continue in session for five weeks.

AMONG the docents who have recently qualified are Dr. Fischer in anatomy and Dr. Mayer, of Vienna, in chemistry at the German University at Prague; Dr. Formanek in applied medical chemistry in the Bohemian University at Prague, and Dr. Haussner in mathematics in the University at Giessen.

DISCUSSION AND CORRESPONDENCE.

COLOR-VISION.

It is not often that a letter appears in SCIENCE that presents the particular combination of characteristics of one of the recent communications on Color Vision. Professor Titchener says expressly that until the recent papers of Müller in the *Zeitschrift für Psychologie* on Her-
